TOPIC Ground Radio Installations at ParbasdorfEVALUATION [REDACTED] PLACE OBTAINED [REDACTED] 25X1DATE OF CONTENT [REDACTED] 637752DATE OBTAINED [REDACTED] DATE PREPARED 22 July 1954REFERENCES [REDACTED]PAGES 1 ENCLOSURES (0) 25X1REMARKS This is UNEVALUATED
Information 25X1

- Between 0800 and 1000 on 20 June 1954, a Token-type radar set was observed on a field-path, about 200 meters east of Parbasdorf (P 49/S 50). No details could be identified because the view was obstructed by high grain. A Fishnet-type radar set was seen about 10 meters south of the Token-type set. A radar installation consisting of a Kniferest-type and a Fishnet-type set was observed about 20 meters west of the Token-type set. Approximately in the middle between the Token-type set and the latter installation was a small hill, apparently an underground bunker, from which a rod antenna projected. Heavy rubber-insulated cables fitted on masts extended from the three latter radar sets to an umbrella-shaped antenna in Parbasdorf. Signal truck [REDACTED] was jacked up next to this antenna. A temporary quartering building at which personnel wearing black-bordered blue epaulets were repeatedly seen had been erected near the signal truck. 25X1
- Truck [REDACTED] with a driver wearing black-bordered blue epaulets was observed in Parbasdorf coming from the direction of Markgrafneusiedl (P 49/S 50) and proceeding toward Deutsch Wagram (P 49/S 50). 25X1

Comment. The radar installation at Parbasdorf consisting of 1 Token-type, 1 Kniferest-type and 2 Fishnet-type radar sets was reported previously. [REDACTED] 25X1

The fact that the installation is located just southwest of Deutsch Wagram airfield and the observation of air force personnel there tend to indicate that the installation belongs to the fighter regiment at Deutsch Wagram airfield and is subordinate to the Fifty-Ninth Air Army. 25X1
